Notes:

- 1) The unemployment rate is calculated using unrounded data.
- 2) Labor force data for all geographic areas now reflect the March 2005 annual revision (or benchmark) and Census 2000 population controls at the state level.
- 3) Sub-county labor force statistics are calculated using area to county ratios of employment and unemployment from the 2000 Census.
- 4) Effective with the release of the February data on March 24, 2006, revised monthly labor force data for the previous month will no longer be released. Labor force data for all geographic areas will not be revised until the annual benchmark process.
